The effective work of some of the schools has been interrupted during the year by a change of teachers. At the close of the spring term we lost two of our teachers, Mr. Buck, who had been for three years at the head of the high school, and Miss Clarke who had been for a longer period in the grammar school, both of whom had given proof of their excellence as teachers. The work of the high school was also broken in the fall and winter terms by a change of teachers, and in the fall term the teacher of the primary room suddenly gave up her place to accept a larger salary. Fortunately we were able, in a short time, to fill the place with but little loss to the school. The intermediate room is the only one that has enjoyed, throughout the year, the continuous service of an experienced and efficient teacher. At the present time all the schools are in excellent condition, and there is every reason to think that they will so remain.

As the efficiency of schools depend above all else upon the quality of the teachers, it is our belief that the district cannot make a wiser expenditure than that which is necessary to secure and retain teachers of recognized merit. While we cannot pay the salaries given in larger towns, it will be a wise policy to go to the extent of our ability in keeping up the efficiency of our teaching force.

The experiment made last year of introducing the study of elementary science into the intermediate room proved to be very successful. The work in physics and chemistry was necessarily limited by the lack of apparatus, but the children were greatly interested, and in botany, where nature supplied the material for illustrations, they were enthusiastic. Herbaria were made that in many cases would have done credit to much older and more advanced pupils. The work, during the present year will be continued, with better preparation, but some addition should be made to the apparatus.

The school building has been kept in good repair, and has never been kept in such thorough preparation for the use of the school as by the present janitor.

REPORT OF THE TOWN DISTRICT SCHOOL BOARD

The School board would respectfully submit the following report :

Twenty-one weeks of school have been maintained in ten different school-houses, and with hardly an exception, our teachers have proved themselves earnest workers, with a hearty response on the part of the scholars. While sickness has been the cause of many absences, and the premature closing of two of our schools, yet we find a goodly number of names on the roll of honor. We would especially praise those who have not let distance or weather interfere with their attendance at school, and would urge scholars to consider the importance of punctuality.

We note with pleasure the interest of parents in the welfare of our schools, as manifested by the unusual number of visitors during the year. We earnestly express the wish that these visits be continued, for if parents coöperate with teachers and scholars as in some schools the past year, we may expect advancement and success.
